-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faul in view of Boulton et al. and Staples.

Faul shows all of the limitations of the claims except for specifying servicing for a locomotive and a hand-held unit with graphical display.

Faul shows, figures 4 and 5, graphical links and instruction for procedures based on the assembly and sub-assembly data found in database 70 and displayed on display 30 of computer 20. Notice the simple example in figure 3, all the parts and visual displays are linked in a series based upon the procedure.

Staples teaches, figure 1, simply that there are field repair crews in the locomotive industry. Inherently, the crews will be using some form of instructions in order to facilitate repair job.

Based on the teaching of Staples, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Faul system to incorporate locomotive procedures as one of its mechanical procedures in order to facilitate repair jobs on locomotives.

Boulton et al. teaches a method for implementing user feedback. Column 8, lines 37-41, teaches a field worker that carries a PDA (hand held, accessible) that includes an installation/maintenance/repair or the like manual that can be used as an instructional material for field work in order to facilitate repair jobs.

Based on the teaching of Boulton et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Faul system to modify computer 20 to link or download its information to the Boulton PDA for field work in order to facilitate repair jobs.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.
